Software Quality Days

The conference for software quality enthusiasts!

**18-20/01/2011
VIENNA
Make it a date!**

Software Quality Days is the biggest software quality event in Austria and **one of Europe's biggest conferences in this field**. This makes it a must for anyone interested in software quality and testing.

With its **keynote, practical and scientific presentations, as well as specialist exhibitions and tutorials etc.**, this specialist symposium offers a wealth of valuable opportunities in terms of **professional software development**, working on **new ideas** and **networking** in this area.

The excellent quality of the presentations and tutorials and a **combination of the latest scientific topics with high-quality project reports** taken directly from practice make this the **TOP software quality event!**
